## ABOUT ME

My QA education combined with previous work experience has given me a great foundation of knowledge and skills. I learn new technologies quickly and apply those abilities to improve the work I do. Additionally, I'm good at computer software installation, software performance testing and testing procedure development.

I have a resourceful approach to problem-solving, tackling challenges head-on and consider obstacles learning experiences. I'm a people-person with high energy and a lot of ambition. I would be honored to join your team.

## EXPERIENCE

- 2017**    SES Global Telecommunications Company  
              Playout Operator
- Responsible over a large number of TV channels that broadcast worldwide.
  - Online content management.
  - Working in an English speaking global environment.
  - Real-time trouble-shooting.
  - Manage tasks under pressure.
  - Team integration with 20 people.
  - Quick answer to real-time problems.
  - Training new employees in the Playout department.
  - Costumer support.
  - A dynamic-ever-changing working environment which requires fast-learning skills as well as good orientation to details.
